PROFESSIONAL SUMMARY

Full Stack Web Developer with 5+ years of experience in PHP, Laravel, MySQL, JavaScript, AJAX, RESTful API development, ERP systems, and e-commerce platforms. Experienced in designing, developing, and maintaining scalable web applications, business automation systems, and enterprise solutions. Demonstrated leadership by independently handling Assistant Manager-level responsibilities for 1.5 years while ensuring smooth project execution and team coordination. Skilled in database optimization, third-party integrations, cloud deployment, and performance tuning. Passionate about building secure, high-performance, and user-centric software solutions.

SKILLS AND ABILITIES

- **Backend:** PHP, Laravel, OOP, MVC, Eloquent ORM, REST API.
- **Frontend:** HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, jQuery, AJAX.
- **Database:** MySQL, Query Optimization, Indexing, Database Design.
- **Tools:** Git, Composer, npm, cPanel, VPS, Cloudflare.
- **CMS:** WordPress Theme Development, Plugin Development.

WORK EXPERIENCE

Senior Software Engineer– JS Enterprise, Dhaka, Bangladesh

2025 - Present

Achievements:

- Led the development, maintenance, and enhancement of **four enterprise ERP systems** (JS ERP, Paimart ERP, UAE ERP, and Weberry ERP) using Laravel, PHP, MySQL, Ajax, and JavaScript.
- Designed, developed, and maintained **Paimart E-commerce Platform** and Multi-Vendor Marketplace, implementing new business features, workflow automation, and performance improvements.
- Independently developing operational panels and business modules for upcoming platforms, including **Pai B2B Marketplace, Pai Aura, and Pai Pharma**.
- Managed project architecture, database design, API integration, and deployment processes across multiple business applications.
- **Optimized complex MySQL queries, joins, indexes, and pagination mechanisms, improving reporting and dashboard performance by approximately 40%.**
- Implemented Push Notification Systems, Google Tag Manager, Facebook Pixel, and Data Layer tracking solutions to support marketing and analytics operations.
- Enhanced application security and performance using **Cloudflare** services including SSL management, caching optimization, and DDoS protection.
- Collaborated directly with management and business stakeholders to gather requirements, translate business processes into software solutions, and ensure timely delivery of critical projects.

Achievements:

- Developed and maintained web application modules using PHP, Laravel, MySQL, JavaScript, jQuery, Ajax, and Bootstrap.
- Assisted in the development and enhancement of ERP and e-commerce systems by implementing new features and fixing application issues.
- Designed and integrated RESTful APIs to support frontend and third-party system communication.
- Collaborated with senior developers to analyze requirements and translate business needs into functional software solutions.
- Participated in deployment activities, version control management, and production issue resolution.
- Assisted in maintaining application security, data validation, and access control mechanisms.

PROJECTS**ERP Systems (JS ERP, Paimart ERP, UAE ERP, Weberry ERP)**

Technology:Laravel, PHP, MySQL,Bootstrap, JavaScript, Ajax, REST API.

- Developed and maintained four enterprise ERP platforms supporting inventory, sales, accounts, and HR operations.Contributed across HRM, Inventory, Accounts, Sales, and Reporting systems.
- Implemented Product Adjustment, Product Return, Sales Target, and Reporting modules.

Paimart E-Commerce Platform (paimart.painest.com)

- Developed customer-facing frontend and user management panel.
- Integrated SSLCommerz payment gateway, OTP verification, and order management workflows.

Enterprise Business Platforms (paib2bweb.paibridge.com - Ongoing)

- Developing operational, inventory, reporting, dealer management, and business automation modules for Pai B2B, Pai Aura, and Pai Pharma platforms.

Paibridge Multi-Vendor Marketplace (paibridge.com - Under Development)

- Developing vendor onboarding, catalog management, order processing, and marketplace workflows.

Corporate & WordPress Websites (blog.paikaree.com.bd, paisoftdiaper.com, jsenterprise.com.bd)

- Developed and maintained multiple WordPress-based websites including Blog.Paikaree.com.bd, Paisoftdiaper.com, and Jsenterprise.com.bd with custom functionality and SEO optimization.
